SCORM Implementation Plan

This document outlines the plan for packaging and deploying the e-learning module using SCORM standards. It includes technical settings, LMS integration details, and testing procedures.

1. Project Information

Course Title	*Insert here*
Authoring Tool Used	*Insert here*
SCORM Version (1.2 / 2004)	*Insert here*
Target LMS	*Insert here*

2. SCORM Package Settings

Tracking Method	*Insert here*
Completion Criteria	*Insert here*
Pass/Fail Settings	*Insert here*
Launch Behavior	*Insert here*

3. LMS Integration Notes

Describe how the course will be uploaded and configured in the LMS (e.g., Moodle, TalentLMS). Include steps such as uploading ZIP file, assigning users, setting course availability.

4. Testing & QA Plan

Outline steps for internal QA before launch. Include SCORM Cloud testing, LMS upload testing, and common troubleshooting checks.

5. Version Control / File Management

Describe file naming conventions and storage location for the final SCORM package.
